

Introducing LacriPure

The New Unit-Dose Rinsing and Insertion Saline from Menicon

Indicated for use with soft, hybrid and rigid gas permeable lenses, LacriPure is a sterile, non-preserved saline which provides an alternative to tap water rinsing.

Packaged in a 5ml unit-dose vial, LacriPure has been approved as a scleral lens insertion solution, providing an on-label solution for safety and convenience.

Menicon LacriPure joins Menicon Unique pH[®] multi-purpose solution and Menicon PROGENT protien remover to complete the industries most comprehensive GP lens care system.
